Acrylic Primer

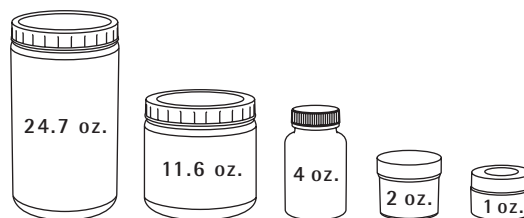

INP's Acrylic Primer sets the stage for beauty. As an effective fungicide that provides the strongest bond between natural and acrylic nails, Acrylic Primer can be applied with any powder or liquid system. Best of all, it was developed to stay cool when applied and contains no methyl-methacrylate acid.

Acrylic Liquid

Beauty takes time. With our Acrylic Liquid, nail professionals have ample setting time to sculpt each nail to its natural beauty. Designed to work with our Acrylic Powder, as well as others on the market, our Acrylic Liquid works beautifully in any season or weather condition. Even better, our liquid causes no powder discoloration, so your shades stay true to form.

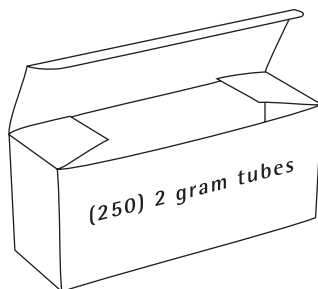

Acrylic Powder

The finest nails come from the finest powder. Our Acrylic Powder is of the highest quality and finest grain, allowing for smooth flow and easy application. When combined with our Acrylic Liquid, the powder forms the strongest bond possible with no lifting. Available in five shades, each powder is made of the same fine grain and can be mixed to create custom colors. Specify Natural, Clear, Light Pink, Medium Pink or White.

Nail Glue

2 gram tube →

In less than three seconds, create a strong bond that lasts with INP's Nail Glue, **FUSE**. Specially developed to eliminate burn, our glue fuses quickly to the nail and will not peel off. For use with all acrylic, fiberglass and silk nail applications.

Polish Sealant

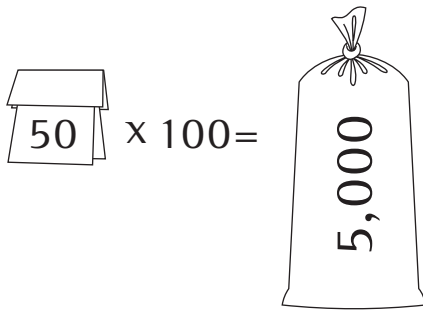

You'll adore how quickly this high-gloss top coat dries and how effectively it eliminates nicks and dents. With INP's Polish Sealant, **ADORE**, beautiful nails that last are created quickly and can even be dried in natural light.

PACKAGING OPTIONS | Intercontinental Nail Products

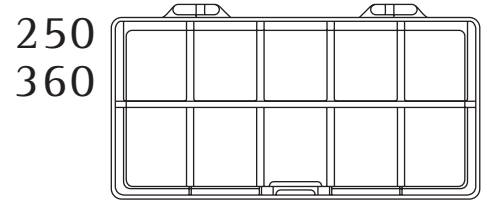

100 (50 ct. bags)

(100) 50 ct. bags in one style, color and size, 5,000 tips total
